smoke-free
Family

AROUND KIDS,
WE DON'T SMOKE.

When a parent smokes around their child, their child also smokes.

Children, and even unborn babies, who are exposed to second-hand smoke are directly affected by the harmful effects on their health.

The Smoke-Free Family campaign serves as a reminder of the importance of safeguarding children's health by making the home and the car smoke-free zones and by smoking far from kids outside.

BWARE OF SECOND-HAND SMOKE

Second-hand smoke is the smoke that comes out of a cigarette and that the smoker exhales.

This smoke contains more than 7,000 chemical products, over 70 of which can cause cancer. And these substances are even more concentrated in enclosed spaces such as a closed room or a car.

SECOND-HAND SMOKE
IN A CAR CAN BE UP TO
27X MORE CONCENTRATED
THAN IN A SMOKER'S HOME

REMINDER

Since May 2016, it is prohibited by law to smoke or vape:

- in CARS when children under 16 are present;
- in OUTDOOR PLAY AREAS for children, on sports fields and playgrounds.
